

Open Source Intelligence OSINT

For Family Offices

Smart information gathering for long-term asset protection

We support you in the comprehensive management of your family, whether by obtaining crucial information from publicly accessible sources about employees, business partners, investments, assets and funding projects, or by means of (social) media monitoring to protect the reputation of family members and asset tracing in the event of a white-collar crime incident.

Which **Open Sources** do we use?

Social media platforms such as Instagram, Facebook, X (former Twitter), TikTok, LinkedIn, Xing, job portals

Documents published online such as annual reports, blockchain transactions

Contents of websites, topic-specific online forums
